

Best-BRA Study Newsletter

This is our second Best-BRA Study Newsletter which we hope you will enjoy reading and find useful. If you have any comments, or you are not currently signed up as a site but would like to take part, please do contact the Best-BRA study team. We would love to hear from you!

Study UPDATE

Sites open: 10
Number of participants recruited: 4
(St George's University Hospitals NHS Foundation Trust (3), North Bristol NHS Trust (1))

The following sites, North Bristol, Durham & Darlington & West Hertfordshire NHS Trusts have entered their screening logs. Return yours now before May 31 to be entered into our prize draw!

Screening Logs

It is really important for Best-BRA that you screen all women having a mastectomy for risk reduction or Breast Cancer who are technically suitable for immediate implant-based breast reconstruction and ENTER these details on the Screening Log please.

If the patient and/or surgeon later opts for a delayed or a different type of reconstruction, this is fine- but please record this on the screening log!

Why are screening logs important for Best-BRA?

This information is required for our **Primary Outcome** therefore we really need this data and would appreciate it if you could fill this in weekly. We will be in touch **monthly** to collect the data from you. We would suggest that you print off the pages of the screening log and have a paper copy on your desk(s).

Every screening log that you send back to us will be entered into a monthly prize draw to win a luxury sweet treat for your site!

Pls- If you return 3 or more screening logs from your site, you will also be included as an author on our main results paper.

NIHR Associate PI Scheme

DID YOU KNOW

that the Best-BRA Study is registered for the NIHR Associate PI Scheme? If you are a doctor, nurse or other healthcare professional who would like to get more involved in research as part of their career, you may be eligible to apply

NIHR | National Institute for Health Research

Mr Muholan Kanapathy, Royal Free London NHS Foundation Trust a registered Associate PI describing why he wanted to take part in Best-BRA:

"I'm a Plastic Surgery trainee and Clinical Lecturer, am pleased to take on the role as an Associate PI as it's a great opportunity for me to further improve my understanding on multicentre RCT in order to prepare myself to be a PI in the future. This role enables me to work closely with the PI, research nurses, trial coordinator and clinical staffs related to the trial. Best-BRA is an important study that can guide future decision making and I am delighted to be part of this study."
